To Whom It May Concern:

I am writing in support of Jay's Aircraft at the John Wayne Airport (KSNA) to remain and expand as approved as the Limited Service FBO. Why am I in support of Jay's?

1. They have been providing critical and necessary aviation services to the airport for over 40 years, primarily maintenance for the smaller aircraft in General Aviation. They have been a long term and loyal customer of SNA. And they have been a major factor in the growth and operation of the airport and have promoted the multiple airport services to the public. The work and the usage of airplanes is a very important contributor to the local and state economy. General Aviation is a huge contributor to the national economy and facilitates business throughout the State of California and neighboring areas.
2. The reputation of Jay's Aircraft is beyond reproach, in my view. They are honest, provide excellent service and without them on the field, General Aviation could not have been nearly as successful as it has at SNA. The aviation community in Orange County and in general is very transparent and close knit. If companies or individuals do not act as "good citizens", they don't last very long. Jay's Aircraft has certainly met and exceeded this standard.
3. I have been a customer for aircraft maintenance and hangar space with Jay's for over 35 years. I have based several different multi-engine piston engine aircraft, two single engine turboprop aircraft and a twin engine turboprop aircraft at Jay's. Our relationship could not be better. I consider Jay's family as my own as well as their employees. They are indeed, special.

In closing, I would be happy to answer any questions you have, either on my cell phone or any other means of communication at any time.

Sincerely,

A handwritten signature in blue ink that reads "W B Eeds".
