Subject: Jay's Aircraft

To Whom it may concern:

It is my understanding that the John Wayne Airport General Aviation Improvement Plan is reaching a major milestone soon and new leases will be awarded to qualified candidates.

As a local general aviation pilot with an airplane located at John Wayne airport I am highly recommending Jay's Aircraft Maintenance as the limited service FBO for John Wayne Airport. They have serviced my plane for as long as I have owned it. have always treated me with respect, honesty and integrity. They charge fair prices and I have recommended them often.

By selecting Jay's Aircraft, you will have a local business where the owners understand the community and are easy to access.

Thank you for your consideration.
