Subject: Re: August 11 Meeting regarding Jay's Aircraft FBO

To the Orange County Board of Supervisors:

As a local Orange County businesswoman, I would like to encourage you to continue with Jay's Aviation FBO at Orange County (John Wayne) Airport.

My experience with Jay's FBO has always been positive. I like that it is a family run business, with Jay's wife, Maria, taking a leading front office role. We need more women like this working in businesses which traditionally have been male-dominated. As to the quality of work and the high standards, there never has been a question of that. Jay's is the 'go-to' place for your small aircraft needs at Orange County Airport and is a credit to the County. I know of no one in the general aviation community who does not both like and respect Jay and his staff.

Please let him continue in business on fair and equitable terms, as making things too hard on him will only drive away this on-field asset for the general aviation community. Jay's is a piece of airport heritage which should be fostered.

Thank you all,

Melissa Zellner
