

Legislative Bulletin

DRAFT

A Publication of the County Executive Office/Legislative Affairs

September 23, 2025
Item No. 27

County of Orange Positions on Proposed Legislation

The Legislative Bulletin provides the Board of Supervisors with analyses of measures pending in Sacramento and Washington that are of interest to the County. Staff provides recommended positions that fall within the range of policies established by the Board. According to the County of Orange Legislative Affairs Program Guidelines adopted by the Board of Supervisors on January 25, 2022, staff recommendations for formal County positions on legislation will be agendaized and presented in this document for Board action at regular Board of Supervisors meetings. When the Board takes formal action on a piece of legislation, the CEO will direct the County's legislative advocates to promote the individual bills as approved by the Board. The Legislative Bulletin also provides the Board of Supervisors with informative updates on State and Federal issues.

The 2025-2026 Legislative Platform was adopted by the Board of Supervisors on November 19, 2024.

On September 23, 2025, the Board of Supervisors will consider the following actions:

RECOMMENDED ACTIONS

1. **Receive and File Legislative Bulletin**

The tables below list the bills the Board of Supervisors has taken positions on in the 2025-26 legislative session.

State Legislation

As of Thursday, September 18, 2025

Bill No.	Author	Subject	Position	Date of Board Action	Status
<u>AB 28</u>	<u>Schiavo</u>	Solid Waste Landfills: subsurface temperatures.	Oppose	6.24.25	2-Year Bill
<u>AB 70</u>	<u>Aguiar-Curry</u>	Solid Waste: Organic Waste Diversion: Biomethane.	Support	6.24.25	Enrolled
<u>AB 81</u>	<u>Ta</u>	Veterans: Mental Health	Support	3.25.25	Enrolled
<u>AB 91</u>	<u>Harabedian</u>	State and local agencies: demographic data	Support	4.22.25	Enrolled
<u>AB 226</u>	<u>Calderon</u>	California FAIR Plan Association	Support	4.08.25	Enrolled
<u>AB 282</u>	<u>Pellerin</u>	Discrimination: housing: source of income.	Support	5.06.25	2-Year Bill
<u>AB 283</u>	<u>Haney</u>	In-Home Supportive Services Employer-Employee Relations Act	Support if amended	8.26.25	2-Year Bill
<u>AB 339</u>	<u>Ortega</u>	Local public employee organizations: notice requirements	Oppose	4.22.25	Enrolled
<u>AB 349</u>	<u>Dixon</u>	Foster care supplement	Support	4.08.25	Enrolled
<u>AB 370</u>	<u>Carrillo</u>	California Public Records Act: cyberattacks	Support	4.22.25	Chaptered
<u>AB 394</u>	<u>Wilson</u>	Crimes: public transportation providers	Support	3.25.25	Enrolled
<u>AB 424</u>	<u>Davies</u>	Alcohol and other drug programs: complaints	Support	3.25.25	Enrolled
<u>AB 462</u>	<u>Lowenthal</u>	Land use: coastal development permits: accessory dwelling units	Support	4.08.25	Enrolled
<u>AB 492</u>	<u>Valencia</u>	Alcohol and drug programs: licensing	Support	3.25.25	Enrolled
<u>AB 571</u>	<u>Quirk-Silva</u>	California Environmental Quality Act: exemption: Gypsum Canyon Veterans Cemetery	Co-Sponsor	2.25.25	Enrolled
<u>AB 607</u>	<u>Rodriguez</u>	CalWORKs: Home Visiting Program.	Support	6.24.25	Enrolled
<u>AB 615</u>	<u>Davies</u>	Power facilities: emergency response and action plan	Support	3.25.25	Enrolled
<u>AB 689</u>	<u>Rubio</u>	Foster Youth: Disaster aid assistance.	Support	6.24.25	Enrolled
<u>AB 1288</u>	<u>Addis</u>	Registered environmental health specialists	Support	4.22.25	Enrolled
<u>AB 1356</u>	<u>Dixon</u>	Alcohol and other drug programs	Support	3.25.25	Enrolled
<u>AB 1387</u>	<u>Quirk-Silva</u>	Mental health multidisciplinary personnel team.	Support	5.06.25	Vetoed
<u>SB 71</u>	<u>Wiener</u>	California Environmental Quality Act: exemptions: transit projects	Support	3.25.25	Enrolled
<u>SB 283</u>	<u>Laird</u>	Energy storage systems	Support	4.08.25	Enrolled

SB 346	<u>Durazo</u>	Local Agencies: Transit Occupancy Taxes: Short-Term Rental Facilitator.	Support	6.24.25	Enrolled
SB 577	<u>Laird</u>	State Government	Support	8.26.25	2-Year Bill
SB 634	<u>Pérez</u>	Local government: homelessness	Oppose	5.06.25	Enrolled

Federal Legislation

As of Thursday, September 18, 2025

Bill No.	Author	Subject	Position	Date of Board Action	Status
<u>H.R. 965</u>	<u>Sherman</u>	Housing Unhoused Disabled Veterans Act	Support	5.20.25	Senate Committee on Banking, Housing, and Urban Affairs
<u>H.R. 1012</u>	<u>Levin</u>	Spent Fuel Prioritization Act of 2025	Support	5.20.25	House Committee on Energy and Commerce
<u>H.R. 2483</u>	<u>Guthrie</u>	SUPPORT for Patients and Communities Reauthorization Act of 2025	Support	6.24.25	Senate Committee on Health, Education, Labor, and Pensions
<u>S. 2212</u>	<u>Padilla</u>	Visible Identification Standards for Immigration-Based Law Enforcement (VISIBLE) Act of 2025	Support	8.26.25	Senate Committee on the Judiciary

 Highlighted sections symbolize a status change.

2. Sacramento Legislative Report

Prepared by Precision Advocacy Group LLC

Although two weeks ago the end of the 2025 legislative session appeared that it may be rather sedate, at the last minute, major proposals were agreed upon by the governor, Senate Pro Tem Mike McGuire, and Speaker Robert Rivas, and were moved through the legislative process in the span of four days. On September 10, bills came into print containing some of the major policy provisions that had been promised by the administration and legislature. These included the cap-and-trade extension, allocation of greenhouse gas emissions fund revenues, and legislation to provide \$18 billion to the state's wildfire fund. An outline of these high-profile measures may be found in the next section of this report.

Additionally, in part due to the Senate Democratic caucus' frustration with some leadership decisions, Senate Pro Tem McGuire announced an earlier than anticipated transition of Senate leadership to Senator Monique Limón (D-Santa Barbara) on November 17. Limón was elected to the Assembly in 2016 and moved to the Senate in 2020. She is a progressive environmentalist with strong union ties and will be the first Latina to serve as senate president pro tem. Limón will have the opportunity to shift committee chairmanships and composition as she deems fit as well as make any staffing changes prior to the beginning of the 2026 legislative session on January 5, 2026. Limón is termed out in 2028.

Governor Gavin Newsom now has until October 13 to complete action on the 827 bills on his desk. We anticipate that, as in prior years, a number of bills will be vetoed based on cost concerns rather than policy differences. We will keep county staff posted

Clean Energy, Climate, and Affordability Solutions

The highest profile measures moving through the legislature in the last days of session weren't publicly available until the morning of September 10, meaning they couldn't be voted upon until 72-hours later - Saturday, September 13. The legislature recessed Saturday morning at about 3 a.m. and returned to the Capitol at 10:30 a.m. to take up these bills and other remaining measures under consideration.

The package of measures included AB 1207 extending the cap-and-trade program until 2045, SB 840 distributing the cap-and-trade revenues, SB 254 replenishing the state's wildfire fund for utilities and make changes to how utilities finance transmission and wildfire prevention, AB 825 expanding California's electricity grid in response to a competitor regional market being launched out of Arkansas, SB 237 authorizing Kern County to pass an ordinance streamlining environmental permitting for new oil wells to boost crude oil extraction, and SB 352 modifying requirements for community air monitoring systems and monitoring plans established by AB 617 (Chapter 136, Statutes of 2017). Because of the lack of time for amendments, it is likely that some of these measures will require refinement or clean-up legislation in 2026.

AB 1207 (Irwin) Climate change: market-based compliance mechanism: extension

- Extends authorization for cap-and-trade through 2045.
- Requires the California Air Resources Board (ARB) to ensure that emissions from covered sources decline with the 2030 and 2045 greenhouse gas emissions targets.
- Maintains existing offsets limits, but requires offsets to be exchanged for allowances under the emissions cap.
- Unfreezes industry assistance factors used to determine allocation of free allowances, allowing ARB, beginning in 2031, to set factors to minimize leakage risk.
- Extends regulatory protections for the oil and gas industry.

- Revises use of revenue from allocation of allowances to utilities to increase and target credits on electric utility bills, except for 5% of revenues directed to support public financing of transmission projects.
- Renames the Cap-and-Trade program Cap-and-Invest.

SB 840 (Limón) Greenhouse gases: Greenhouse Gas Reduction Fund: studies

Reconfigures the continuous appropriations established for the Greenhouse Gas Reduction Fund (GGRF) and sets new legislative intent for how GGRF funds are spent. The bill also directs ARB to assess and update compliance offset protocols and establishes a new unit within the Legislative Counsel Bureau to support climate and environmental policymaking efforts.

The goal of the legislature in passing SB 840 was to make reforms to maintain the legitimacy of the program while containing consumer costs and adding essential oversight and accountability measures. The bill also allows the investment of billions of dollars in climate infrastructure over the next 20 years to fund clean transportation, housing and community investment, clean air and water, wildfire prevention and resilience, agriculture, clean energy, and climate-focused innovation.

Specifically, SB 840:

- Sunsets existing GGRF continuous appropriations as of July 1, 2026.
- Establishes the following new GGRF allocations totaling approximately \$4.2 billion annually beginning in 2026-27:
 - \$70-90 million annually until 2031 to backfill the State Responsibility Area fire prevention fee.
 - \$100-150 million annually until 2031 to fund the manufacturing tax credit.
 - \$3 million to establish the Legislative Counsel Climate Bureau.
 - \$1 billion continuously appropriated to the High-Speed Rail Authority.
 - \$1 billion reserved for appropriation by the legislature, with the intent that this amount is allocated in the following amounts for the 2026-27 fiscal year:
 - \$125 million for transit passes.
 - \$25 million for seed funding for a University of California Climate Research Center.
 - \$15 million for rebuilding Topanga Park.
 - \$85 million for an entity chosen by the legislature to support climate-focused technological innovation, related research, and the deployment of climate solutions identified in the ARB scoping plan.
 - Remaining money in the fund continuously appropriated as follows (subject to proportional reductions by Department of Finance if revenues are insufficient):
 - \$800 million to the Strategic Growth Council for the Affordable Housing and Sustainable Communities Program.
 - \$400 million to the Transportation Agency for the Transit and Intercity Rail Capital Program.
 - \$250 million to ARB for community air protection programs and allocated for financial incentives to reduce mobile and stationary sources of criteria air pollutants or toxic air contaminants consistent with community emissions reduction programs and for support for local air districts' implementation of AB 617.
 - \$200 million to the Transportation Agency for the Low Carbon Transit Operations Program.
 - \$200 million to the Department of Forestry and Fire Protection and allocated as follows:
 - 82.5% for healthy forest and fire prevention programs and projects that improve forest health and reduce emissions of greenhouse gases caused by uncontrolled wildfires.

- 17.5% for the completion of prescribed fire and other fuel reduction projects through proven forestry practices consistent with the recommendations of the California Forest Carbon Plan.
- \$130 million to the Safe and Affordable Drinking Water Fund.

SB 254 (Becker) Energy

Of primary interest to the county, SB 254 provides new savings for utility ratepayers through public infrastructure financing and solutions to protect ratepayers and fire victims through California's Wildfire Fund by authorizing the extension of the fund for 10 years to 2045 and replenishing the fund with \$18 billion over 10 years, shared between ratepayers and utility shareholders. SB 254 also:

- Creates the California Transmission Accelerator at the Governor's Office of Business and Economic Development (Go-Biz).
- Prohibits electrical corporations from including \$6 billion in wildfire risk mitigation investments in their rate base for purposes of earning profit and authorizing securitization of those costs.
- Provides additional authorization of securitization for costs arising from 2025 wildfire liabilities if they are in excess of the existing Wildfire Fund, with a possibility for IOU shareholders repaying costs, as specified.
- Modifies permitting processes and procedures for "clean" energy projects.
- Modifies wildfire risk mitigation requirements and conformity of oversight responsibilities between the Office of Energy Infrastructure Safety and the California Public Utilities Commission.
- Streamlines planning and design information of infrastructure projects at the California Underground Safety Board.

The measure sparked some controversy within local governments, as it will invest greater power in the California Energy Commission (CEC) under the AB 205 opt-in permitting program, strengthening the CEC's ability to ignore local laws, regulations, and objections of the community in which the project will be located. The bill repeals provisions of Public Resources Code that require the CEC to ensure projects conform with public safety standards, air and water quality standards, and other applicable local, regional, state, and federal standards, ordinances, or laws. Existing law allows the CEC to certify a project that is inconsistent with local laws only if it first meets and confers with the local agency and determines that the facility is required for public convenience and necessity and there is no more prudent and feasible means of achieving public convenience and necessity.

SB 237 (Grayson) Oil spill prevention: gasoline specifications: suspension: California Environmental Quality Act: exemptions: County of Kern: transportation fuels assessment: coastal resources

Contains a number of provisions that seek to increase in-state oil production (such as through testing of previously-idled pipelines, greater disclosure of financial assurances, and resolving ongoing litigation in favor of easier approval of drilling permits in Kern County), while also soliciting additional information to mitigate rising fuel costs (such as by relaxing California gasoline standards) and assess medium- to long-term strategies in line with recent work from the California Energy Commission. The bill also increases oversight of the restart of idle oil pipelines along California's coast and directs state agencies to study options for switching California off of its unique, less-polluting gasoline blend.

SB 237 was a response to Valero's announcement that it plans to close its Bay Area refinery by April of next year, which sparked concerns that the loss of another facility could cause gas prices to increase. The California Energy Commission included boosting Kern County drilling among its June recommendations for stabilizing the industry. It is also part of the legislature's action on making California more affordable by lowering gas prices at the pump and for goods and services impacted by gas prices.

AB 825 (Petrie-Norris) Independent System Operator: independent regional organization

Authorizes the California Independent System Operator (CAISO) and the electrical corporations whose transmission is operated by the CAISO to use voluntary energy markets governed by an independent regional organization (RO) if specified requirements are met. Simply put, it creates a unified Western electricity grid to help California stabilize the power grid and reduce emissions.

The goal of AB 825 is to make it cheaper and more efficient to be able to trade excess solar or hydroelectric power with other states. California is now at risk of losing its neighboring utilities to a competitor energy market being launched out of Arkansas.

SB 352 (Reyes) Environmental justice: Department of Justice: Bureau of Environmental Justice: community air monitoring

Codifies the Environmental Justice Bureau at the Department of Justice and strengthens air quality monitoring and reporting requirements under the AB 617 program, as the first step in implementing the new continuous appropriation of \$250 million annually for the program.

Specifically, the bill requires additional reporting from ARB and the air districts regarding the expenditure of funds pursuant to AB 617. AB 617 (2017) authorized CARB and the air districts to identify communities disproportionately impacted by air pollution and established a process to incorporate community input into community emission reduction plans. While the goal of the program was to empower communities to identify local solutions, there have been delays in implementation. According to the author, lawmakers need to be able to make informed decisions on how state funding is being used and be able to respond to barriers to implementing the emission reductions plans.

Grant Opportunities

Below is a list of the latest grant opportunities released by the state. All opportunities for local jurisdictions may be found [here](#).

Deadline: 11/5/25 12:00

Title: [Lunch at the Library Summer 2026](#)

State Agency / Department: [CA State Library](#)

Match Funding? No

Estimated Total Funding: \$3,000,000

Funding Method: Advances & Reimbursement(s)

Deadline: 10/24/25 12:00

Title: [Division of Boating and Waterways Aquatic Center Boating Safety Education Grant FY25](#)

State Agency / Department: [Department of Parks and Recreation](#)

Match Funding? No

Estimated Total Funding: \$1,400,000

Funding Method: Reimbursement

Deadline: 10/9/25 17:00

Title: [2025 CalAgPlate Grant Program](#)

State Agency / Department: [CA Department of Food and Agriculture](#)

Match Funding? No

Estimated Total Funding: \$200,000

Funding Method: Advances & Reimbursements

- Erin Schwier, of San Diego, has been appointed to the California Board of Occupational Therapy
- Ada Boone Hoerl, of Sacramento, has been appointed to the California Board of Occupational Therapy
- Bridget Legnavsky, of Norden, has been appointed to the California Travel and Tourism Commission

3. Washington D.C. Legislative Report

LEGISLATIVE BRANCH ACTIVITY

Shutdown Odds Increase as Congress Negotiates Continuing Resolution

The odds of a government shutdown are increasing as the September 30 end of the current fiscal year approaches. Currently, Congress is scheduled to recess for the third week of September, returning to Washington on September 29, and will need to immediately pass a continuing resolution (CR), continuing current (FY25) funding levels on a temporary basis until full appropriations bills can be finalized. Currently, the White House and Congressional Leadership do not have an agreement on topline numbers used by appropriators to finalize the 12 appropriations bills. Last week, the Legislative Branch, Military Construction and Department of Veteran's Affairs, and the Agriculture and Food and Drug Administration bills were sent to a conference committee between the House and Senate, the historical mechanism for resolving differences in funding levels across the bills and that Congress has not used since 2018.

Any agreement on government funding will require the support of seven Democratic Senators and unified Republican support in the House, where Speaker Mike Johnson can only afford to lose two votes. House Republican Leadership [announced](#) their plan on September 16, to introduce a roughly seven week "clean" CR into November and possibly make a deal on a set of Affordable Care Act Subsidized Health Insurance Premiums set to expire at the end of the year. This is a copy of Republican's previously successful strategy from March, when a number of Senate Democrats allowed a CR to pass and averted a government shutdown. The President [weighed](#) in to support the strategy, endorsing a clean CR, though he has previously pressed for a longer-term CR through January.

Given the disagreement over strategy within the Democratic caucus and the potential for enough Republican opposition to scuttle a clean CR, the odds of a government shutdown have significantly increased since the beginning of the month.

House Seeks to Pass Legislation Modifying Veteran's Benefits

The House worked through several veteran's related bills this week under a special procedure for votes with significant bipartisan support. These included [HR 3951](#), which would afford health care providers flexibility in performing disability examinations for veterans, [HR 3579](#), to modify the Veteran Readiness and Employment Program, [HR 3767](#), to ensure full-time employment offers for graduates of the Health Professionals Scholarship Program and make other changes meant to address the VA's staffing shortage, and [HR 1107](#), to further codify the ability of VA physicians to prescribe medicine via telemedicine without an in-person exam.

EXECUTIVE BRANCH ACTIVITY

EPA Leads Artificial Intelligence Roundtable, Emphasizes Permitting Reform Efforts

Environmental Protection Agency (EPA) Administrator Lee Zeldin held a roundtable on September 15 at the White House on Artificial Intelligence (AI) and data centers. The Administrator celebrated actions taken by the EPA and the Trump Administration since January to further enable data center construction and emphasized the need for additional permitting reforms to increase energy capacity and ease of construction. The EPA has recently initiated a number of reforms to decrease regulations on carbon emitters, including seeking to revoke the [endangerment finding](#), the legal/regulatory basis for the agency regulating greenhouse gas emissions under the Clean Air Act.

AI data centers are expected to substantially increase electricity demand beyond current grid capacity and are [expected](#) to double or triple within the next 3 years, reaching 12% of total US electricity use. Given this demand, energy suppliers of all types are rushing to increase grid capacity and the EPA, Department of Energy, the White House, and Congress are all contemplating regulatory and legislative reforms to meet the increased demand.

Permitting reform efforts are currently being discussed in Congress, particularly [HR 4776](#), the SPEED Act, seeks to lower the cost of construction nationwide for infrastructure projects by creating NEPA and CEQA (or other state standard) equivalency and limiting overly burdensome litigation efforts from halting previously approved developments.
