* If the contracting party is a corporation, (2) two signatures are required: one (1) signature by the Chairman of the Board, the President or any Vice President; and one (1) signature by the Secretary, any Assistant Secretary, the Chief Financial Officer or any Assistant Treasurer. The signature of one person alone is sufficient to bind a corporation, as long as he or she holds corporate offices in each of the two categories described above. **ATTACHMENT A
SCOPE OF WORK****I. BACKGROUND:**

The County is responsible for investigating and responding to both emergency and non-emergency pollution incidents, which include illegal discharges, accidental spills or releases, as well as abandoned/dumped materials within the County's jurisdiction. Due to the potential hazard these occurrences pose to public health and/or the environment, County staff must respond accordingly on a 24 hours/day, 365 days/year basis whenever there is impact or threatened impact to areas within County jurisdiction which includes all:

- Unincorporated County areas;
- County roadways;
- County facilities, properties, harbors, beaches and parks;
- Orange County Flood Control District (OCFCD) drainage facilities, creeks and channels.

In addition to these areas of responsibility, currently, 31 cities (see list in **Attachment A.1.**) within Orange County have executed agreements with OCFCD for pollution response implementation assistance. This means that upon request by city staff when technical support and resources are needed, County staff is authorized to respond on behalf of those agreement cities to oversee investigation and cleanup of pollution incidents.

The County is also the lead agency in the Countywide Area Spill Control (CASC) program, which is being implemented throughout Orange County by all cities and wastewater agencies. The primary goal of CASC is to contain and divert large sanitary sewer overflows (SSOs) that have impacted municipal drainage facilities back into the sanitary sewer system. However, the main principles of CASC can also be applied to pollution incidents in which municipal drainage facilities have been impacted by non-hazardous materials and are safe to dispose of within the sanitary sewer system (see **Section II.2.**).

II. SCOPE OF SERVICES:

Contractor shall provide the following services:

II.1 EMERGENCY ENVIRONMENTAL CLEAN-UP SERVICES:

Environmental clean-up services requiring immediate response as determined by County staff shall be considered "emergencies". Upon contact for assistance with an emergency environmental clean-up, Contractor shall indicate within 10 minutes time if requested labor and equipment are available. If emergency response by the Contractor is mutually agreed upon and initiated, Contractor shall mobilize resources based on information provided over the phone or via email by County staff. A field supervisor representing the Contractor shall arrive on scene within 30 minutes of initiation of an emergency response unless traffic or location of the incident makes travel within this time frame infeasible. All other labor, equipment and supplies shall arrive on scene as soon as possible but no more than 90 minutes from request by County staff unless otherwise agreed upon. Typical tasks that may be required of Contractor to be performed under the direction of County staff on an emergency environmental clean-up include:

- A. Deploy containment and absorbent material/boom, and temporary barriers (such as dirt berms, sand and/or gravel bags) as needed, to control and recover pollutants.
- B. Deploy heavy equipment as needed to establish containment berms; remove wastes and contaminated material; and position/relocate/recover equipment, containment booms, etc.

- C. Deploy vacuum trucks of appropriate size as required, trailer-mounted and portable pumps and other equipment as necessary to contain and recover pollutants, contaminated debris, and sediment.
- D. Perform steam/high pressure washing of roadways, underground stormdrain lines, flood control structures, and any other areas deemed necessary to remove pollutants and contamination. Where practical, vacor trucks may be used to “jet” underground pipelines in lieu of pressure washing. Capture and containment measures shall be implemented to prevent the release of pollutants and contaminated debris dislodged during the steam/high pressure washing cleaning procedure.
- E. Perform confined-space entry when needed to conduct environmental clean-up services. Confined-space activities may involve work in oxygen deficient or hazardous atmospheres, requiring appropriate safety and monitoring equipment.
- F. Under certain hazardous conditions Contractor may need to work in Levels A, B, C, or D PPE as part of this scope of work, and these costs should be included as appropriate with staff billing rates.
- G. Set up temporary storage bins or tanks as needed for collection and quantification of solid and/or liquid wastes recovered during clean-up. Secondary containment shall be provided as necessary.
- H. Deploy light towers for crews to operate safely at night or in darkness
- I. Provide all necessary traffic control measures for crews to operate safely. Traffic control measures shall meet the requirements of the California Vehicle Code, Section 21400, and comply with the "California Manual on Uniform Traffic Control Devices for Streets and Highways.
- J. Conduct video camera inspection of underground stormdrain lines as necessary.
- K. Deploy skiffs, pontoon boats and other watercraft as necessary to conduct emergency clean-up operation in deep water flood control channels, flood control basins, harbors and lakes.
- L. Perform trauma scene and human waste cleanups, including decontamination of blood/sewage-borne pathogens within impacted areas. Contractor must be a Registered Trauma Scene Management Practitioner (RTSMP).
- M. Recover abandoned and illegally disposed waste from County right of way as directed by County staff. Waste material may include hazardous and non-hazardous items, as well as universal wastes such as electronic products, batteries, fluorescent bulbs, etc.
- N. Assist County with incident command duties in accordance with the federal Incident Command System (ICS) when needed. Establish Incident Command post upon request by County staff and prepare Incident Action Plans (IAP) on-site as needed.
- O. Perform all work in compliance with environmental and safety regulations.
- P. Prior to waste pickup, Contractor shall determine and provide suggestions to County on the most cost effective and appropriate waste disposal options.
- Q. When County staff contacts Contractor to request services, the following shall be provided:

- Any and all information regarding the incident via phone and/or email, including details such as the exact location of the incident, the nature material spilled/released, estimated volume, estimated impacted areas, staging areas, incident command location;
 - Requests for specific labor, equipment and resources. If the specific requested labor and equipment cannot be provided by Contractor, County staff shall be immediately notified before alternate equipment/resources are dispatched. If labor, equipment and resources are dispatched which were not requested by County staff or mutually agreed upon between Contractor and County staff, Contractor shall not be compensated.
- R. County staff shall function as incident command unless otherwise notified and shall direct all on-scene environmental clean-up operations by Contractor. No critical response decisions should be made by Contractor without consulting County staff.
- S. Participate in post-incident debriefings and other meetings as requested by County staff.
- T. Due to the potential for litigation and consequences of misinformation, Contractor shall ensure that questions or information requests regarding incidents are referred to County staff.
- U. Upon request, other specialized tasks or activities not listed above may be required by County staff. These tasks may include retaining subcontractors or third party services.

II.2 COUNTYWIDE AREA SPILL CONTROL (CASC) RESPONSE SERVICES:

As discussed in the background section of this scope of work, the County is the lead agency on implementation of the CASC program for containment and recovery of SSOs and is in the process of executing a Memorandum of Understanding (MOU) with each and every city and wastewater agency in Orange County. Once a city or wastewater agency is party to the MOU, and a decision to activate CASC is made, they will have the ability to request Contractor's services, equipment, and supplies as detailed in this section of the scope of work at the same pricing noted in Attachment B.

Upon activation of CASC and a notification to Contractor by County /city/wastewater agency staff that assistance with a CASC response may be needed, Contractor shall indicate within 10 minutes time if requested labor and equipment are available.

Once potential assistance with a CASC response is mutually agreed upon, Contractor shall begin to immediately "pre-mobilize" labor and equipment as requested over the phone or via email by County/city/wastewater agency staff, in anticipation of CASC activation. With a "pre-mobilization" notification of at least 30 minutes, the Contractor shall respond on scene with requested labor and equipment as soon as possible but no more than 60 minutes from CASC activation unless otherwise agreed upon.

Without a "pre-mobilization" notification, the Contractor shall respond on scene with requested labor and equipment, as soon as possible but no more than 90 minutes from CASC activation unless otherwise agreed upon. While many of these tasks are similar to tasks in Section II.1 above, the primary differences are that for the CASC program, the wastes involved will be either sanitary sewer wastewater or non-hazardous materials which will be diverted to the sanitary sewer system and that there may be multiple agencies involved. Typical tasks that may be required of Contractor to be performed under the direction of County/city/wastewater staff on a CASC response include the following:

- A. Deploy sandbags or other devices/materials at locations specified by County /city/wastewater agency staff within roadways, municipal drainage facilities, and flood control channels and basins, to contain SSOs and other non-hazardous spills and releases. Some containment materials may be available from pre-determined staging locations, as directed by County/city/ wastewater agency staff. Contractor must have minimum of 500 sand bags available for deployment.
- B. Deploy trailer-mounted (must have a minimum of two, 1000 GPM, self-priming trailer-mounted pumps) and portable pumps (must have a minimum of four, 400 GPM, self-priming pumps) and other equipment as directed by County/city/wastewater agency staff to divert SSOs and other non-hazardous spills and releases into the sanitary sewer system. Minimum of 1000 ft. of hose must be available.
- C. Perform steam/high pressure washing of roadways, underground stormdrain lines, flood control structures, and any other areas deemed necessary to remove pollutants and contamination from SSOs and other non-hazardous spills and releases. Where practical, vactor trucks may be used to “jet” underground pipelines in lieu of pressure washing. Capture and containment measures shall be implemented to prevent the release of pollutants and contaminated debris dislodged during the steam/high pressure washing cleaning procedure from flowing and impacting downstream areas.
- D. Recovered wastewater from CASC response activities will be transferred/diverted into the sanitary sewer system for disposal.
- E. Perform confined-space entry when needed to conduct CASC response activities.
- F. Set up bins or tanks as needed for temporary storage of solid and/or liquid wastes recovered during CASC response services. Secondary containment shall be provided as necessary.
- G. Deploy light towers for crews to operate safely at night or in darkness
- H. Provide all necessary means of traffic control for crews to operate safely. Traffic control measures shall meet the requirements of the California Vehicle Code, Section 21400, and comply with the "California Manual on Uniform Traffic Control Devices for Streets and Highways.
- I. Conduct video camera inspection of underground stormdrain lines as necessary.
- J. Deploy skiffs, pontoon boats and other watercraft as necessary to conduct CASC response services in deep water flood control channels, flood control basins, harbors and lakes.
- K. Assist County/city/wastewater agency staff with incident command duties in accordance with the federal Incident Command System (ICS) when needed. Establish Incident Command post upon request by County/city/wastewater agency staff and prepare Incident Action Plans (IAP) on-site as needed.
- L. Participate in CASC training exercises upon request by County/city/wastewater agency staff. CASC training exercises may be conducted with or without advance notice to gauge readiness and effectiveness of Contractor’s response.
- M. Participate in post-CASC incident debriefings and other meetings as requested by County /city/wastewater agency staff.

- N. Provide written report summarizing CASC response activities within 5 business days of assistance on a CASC incident.
- O. Perform all work in compliance with environmental and safety regulations.
- P. When County staff, as well as city/wastewater agency staff party to the CASC MOU, contacts Contractor to request services the following shall be provided:
- Any and all information regarding the incident via phone and/or email, including details such as the exact location of the incident, the nature material spilled/released, estimated volume, estimated impacted areas, staging areas, incident command location;
 - Requests for specific labor, equipment and resources. If the specific requested labor and equipment cannot be provided by Contractor, County/city/wastewater agency staff shall be immediately notified before alternate equipment/resources are dispatched. If labor, equipment and resources are dispatched which were not requested by County/city/wastewater agency staff or mutually agreed upon between Contractor and County/city/wastewater agency staff, Contractor shall not be compensated.
- Q. County/city/wastewater agency staff shall function as incident command unless otherwise notified and shall direct all on-scene environmental clean-up operations by Contractor. No critical response decisions should be made by Contractor without consulting County/city/wastewater agency staff.
- R. Due to the potential for litigation and consequences of misinformation, Contractor shall ensure that questions or information requests regarding incidents are referred to County staff.
- S. Upon request, other specialized tasks or activities not listed above may be requested by County/city/wastewater agency staff. These tasks may include retaining subcontractors or third party services.

II.3 NON-EMERGENCY ENVIRONMENTAL CLEAN-UP SERVICES:

Environmental clean-up services not requiring immediate response as determined by County staff shall be considered “non-emergencies”. Upon request, County staff and Contractor shall establish a mutually agreeable schedule for non-emergency environmental clean-ups. Typical tasks that may be required of Contractor to be performed under the direction of County staff on a non-emergency environmental clean-up include all of those identified within **Section II.1** of this scope of work.

II.4 DISPOSAL:

All waste to be disposed of will be prioritized by County for recycling, treatment or disposal. Contactor shall provide County staff with costs estimates for available options and based on the above priority and feasible costs, County staff will provide direction to Contractor for appropriate waste disposal.
