A-E SCOPE OF SERVICES

SUBJECT: On-Call Professional Architect-Engineer (A-E) Services for Facilities/Airport Engineering Projects

I. A-E SCOPE OF WORK

The possibility of a variety of emergency conditions occurring on the airfield that could shut down air carriers, general aviation, and/or essential facilities at the Airport is the basis for contracted staff. A-E working under the on-call A-E contract for professional engineering services is expected to be available on short notice (less than two hours) to respond to emergency conditions on the airfield and/or essential facilities at John Wayne Airport. Conditions that could interrupt air carrier operations or essential facilities are a major concern of the Federal Aviation Administration (FAA) and John Wayne Airport. This contract is to provide Structural Engineering services to maintain JWA in a safe, operable condition at all times. In addition, scope of this contract shall provide A-E services for capital projects, to ensure that conditions do not arise that could interrupt construction or the operation of essential facilities. A-E shall provide necessary professional Structural Engineering services and shall be available on short notice to make recommendations to correct structural related problems. The open contract is also for miscellaneous small projects that are anticipated, but are not yet defined. These small projects are mainly changes to existing structures due to changes in use, new requirements, verification of field conditions, and updating or correction of record drawings.

II. A-E SCOPE OF WORK SERVICES

A-E services shall include services customarily performed by a Structural Engineer including, but not limited to the following:

A. Services

1. Inspection and analysis of small buildings or other structures for existing conditions relative to current seismic design and construction requirements with recommendations for retrofitting if needed.
2. Assess various loads acting on a building or other structure, including dead loads, imposed loads, wind loads, and others in accordance with the relevant safety specifications.

3. Select suitable structural systems to carry these loads safely to the foundation depending on the nature of the soil.
4. Calculate the dimensions of beams, columns, slabs, walls, foundations, staircases, lift wells, etc. in accordance with the relevant standard specifications.
5. Plan review for seismic and foundation requirements.
6. Updating record drawings.
7. Identification of failures to meet OSHA requirements with recommendations for meeting these requirements.
8. Peer review of submitted plans and specifications.
9. A-E shall perform related Structural Engineering services at John Wayne Airport, as required.

B. TSA Personnel Identification Requirements

Architect-Engineer personnel identification requirements when working in secured areas of the Airport include the following:

1. The TSA requires all persons working within the Airport to be badged. This requires that each individual have an appropriate badge worn in full view at all times. The badge will display a picture of the individual, their name, and other required information. The individual will be required to pass an FBI background check that includes fingerprinting, and attend and pass a Security Identification Display Area (SIDA) class. Also, the individual will be required to pass an airfield driving test for a permit to drive on the airfield, if required by JWA. Pending approval by JWA, training and badging can be charged to the A-E open contract.
2. John Wayne Airport requires all A-E vehicles on the Air Operations Area (AOA) to be identified by a hangtag issued by Airport Operations.

C. TSA Security and FAA Safety Requirements

1. Security:

Every person must be badged (Only as required by the Airport), or be in the presence of a badged person, at all times when in a secured area (airfield or structure). Each badge applicant will be photographed and fingerprints will be taken for Federal and TSA security records. The time required for badging may be charged to the A-E open contract as approved by JWA.

All equipment and vehicles must be identified with their company logo and have an FAA flag on the equipment and/or vehicle when needed. If Airport Maintenance cannot furnish an FAA flag, purchase of an FAA flag is to be a reimbursable item.

2. Safety:

Most safety requirements are related to the AOA. Aircraft always have the right-of-way. Vehicles/equipment must halt and wait until the aircraft has moved out of the area. Speed limit is 10 mph on the airfield unless otherwise posted.

All personnel are to be accompanied by someone familiar with Airport safety and security requirements. Also, any person working in close proximity to aircraft must take great care to protect aircraft from any damage. Cost of repair of any damage to aircraft will be charged to the responsible party and may be several hundred thousand dollars.

Every person on the AOA must obey orders by the Airport escort in regard to safety. Every person on the AOA has the responsibility, when in doubt, to ask questions for clarification of safety requirements.

III. REFERENCE INFORMATION

- A. Record drawings (where available) and the contract files from the original construction.
- B. Studies and related documents completed by the County in recent years that contain information beneficial in the technical research of the project areas under the Scope of Work.
