Please support the citizens of Newport Beach who struggle with the daily noise and pollution from JWA. Please work with our city to not add any more flights now coming at us from the general aviation jets. Please hear us and work with principles of Alternative 3 plan verses Plan 1. This should not be a black and white vote but one that works for your citizens who carry the burden of noise and pollution for the whole county. There must be some compromise that benefits Newport Beach and the airport.

Thank you for considering our request.
