3. INSURANCE

required insurance at A-E's expense, including all endorsements required herein, necessary to satisfy the COUNTY that the insurance provisions of this CONTRACT have been complied with. 3.1.2 A-E shall ensure that all subcontractors performing work on behalf of A-E pursuant to this CONTRACT shall be covered under A-E's insurance as an Additional Insured or maintain insurance subject to the same terms and conditions as set forth herein for A-E. A-E shall not allow subcontractors to work if subcontractors have less than the level of coverage required by COUNTY from A-E under this CONTRACT. It is the obligation of A-E to provide notice of the insurance requirements to every subcontractor and to receive proof of insurance prior to allowing any subcontractor to begin work. Such proof of insurance must be maintained by A-E through the entirety of this CONTRACT for inspection by COUNTY representative(s) at any reasonable time.

1. In addition to the duty to indemnify and hold the COUNTY harmless against any and all liability, claim, demand or suit resulting from A-E's, its agents, employee's or subcontractor's performance of this CONTRACT, A-E shall defend the COUNTY at its sole cost and expense with counsel approved by Board of Supervisors against same; and
2. A-E's duty to defend, as stated above, shall be absolute and irrespective of any duty to indemnify or hold harmless; and
3. The provisions of California Civil Code Section 2860 shall apply to any and all actions to which the duty to defend stated above applies, and the A-E's SIR provision shall be interpreted as though the A-E was an insurer and the COUNTY was the insured.

11. COUNTY shall notify A-E in writing of changes in the insurance requirements. If A-E does not deposit copies of acceptable Certificates of Insurance and endorsements with COUNTY incorporating such changes within thirty (30) days of receipt of such notice, this CONTRACT may be in breach without further notice to A-E, and COUNTY shall be entitled to all

legal remedies.

12. The procuring of such required policy or policies of insurance shall not be construed to limit A-E's liability hereunder nor to fulfill the indemnification provisions and requirements of this CONTRACT, nor act in any way to reduce the policy coverage and limits available from the insurer.

4. INDEMNITY/COMPLIANCE

4.1 A-E shall indemnify, defend with counsel approved in writing by COUNTY, and hold harmless, the COUNTY, and its respective agents, officers, and employees from employer sanctions and any other liability which may be assessed against A-E or the COUNTY or both in connection with any alleged violation of any Federal or State statutes or regulations pertaining to the eligibility for employment of any persons performing work under this CONTRACT.

If COUNTY discovers any errors or omissions prior to approving A-E's PROJECTS/SERVICES, the PROJECTS/SERVICES will be returned to A-E for correction. Should COUNTY or others discover errors or omissions in the work submitted by A-E after COUNTY's approval thereof, COUNTY's approval of A-E's PROJECTS/SERVICES shall not be used as a defense by A-E.

4.3 Indemnification

4.3.1 A-E agrees to, indemnify, defend with counsel approved in writing by COUNTY, and hold COUNTY and its respective elected and appointed officials, officers, employees, agents and those special districts and agencies which COUNTY'S Board of Supervisors acts as the governing Board ("COUNTY INDEMNITEES") harmless from any claims, demands or liability of any kind or nature, including but not limited to personal injury or property damage, arising out of, pertaining to, or relating to the negligence, recklessness, or willful misconduct of the A-E. - 5.4.5** Upon termination of the CONTRACT with A-E, the COUNTY may begin negotiations with a third-party A-E to provide goods and/or PROJECTS/SERVICES as specified in this CONTRACT.
- 5.4.6** The right of either party to terminate this CONTRACT hereunder shall not be affected

in any way by its waiver of or failure to take action with respect to any previous default.

SCOPE OF WORK
FOR
DESIGN OF PHASE VIII-A GROUNDWATER PROTECTION AND STOCKPILE LOCATIONS
AT
FRANK R. BOWERMAN LANDFILL**

INTRODUCTION

This scope of work has been prepared for the preparation of construction drawings, technical specifications, design calculations, geotechnical engineering, hydrology and hydrogeology, biological mitigation, construction cost estimates, and for providing design support services during the construction of composite liner at Frank R. Bowerman Landfill (FRB). In addition, design services for creating stock pile plans (STP) outside the area designated for Phase VIII-A liner and development of soil management (SMP) and soil management plans may be needed. The Architect-Engineer (A-E) Firm hereinafter referred to as the A-E, will provide design support for civil services and environmental permitting support as required.

The A-E will work under the general supervision of the OC Waste & Recycling (OCWR) Project Manager located at the FRB site. All of the A-E activities will be performed from their respective offices, except construction support to be performed at the FRB site. Any interface with other County agencies, regulatory agencies or other interested parties will be coordinated with the OCWR Project Manager.

SCOPE OF SERVICE (TASKS) IS PRESENTED BELOW

I. REVIEW EXISTING DATA

At the start of the project, the A-E will collect and review existing information pertaining to the project. Potential sources of information include the following:

- A.** As-built documents, geological and geotechnical characterization reports, hydrogeological reports, and slope stability reports
 - 1. Historical landslide monitoring data
 - 2. Planning-related constraints as contained in CEQA and NCCP documents
 - 3. Historical aerial photographs of the site
 - 4. Latest approved revisions and planned changes to the Joint Technical Document (JTD)
 - 5. Facility permits including waste discharge requirements (WDR), solid waste facility permit (SWFP), and anticipated U.S. Army Corps of Engineers and California Department of Fish and Game permits

II. GEOTECHNICAL ENGINEERING

The A-E will conduct a geotechnical exploration program to evaluate, as well as supplement data, on geotechnical/geologic conditions within the project area to support the grading and liner design plan. The exploration will include geologic mapping, a limited trenching and boring program, laboratory testing, and slope stability analyses.

If necessary, a supplemental field exploration will be performed for geologic and geotechnical characterization of the area to design any landslide mitigation measures, such as a soil buttress.

A. Geologic Mapping

1. The field mapping program will include site reconnaissance and surface geologic mapping. The surface geologic mapping will be performed to obtain information on the nature and structural aspects of the bedrock formations. This information will be used to identify areas such as contacts between geologic formations and potentially low-strength layers where additional information may be required for design.
2. During the course of the field work, details of the site geology, including distribution of geologic contacts, discontinuity characteristics and their orientation, and groundwater features, will be compiled on a topographic base map. Geologic cross-sections will be prepared to include the preliminary grading plan and the results of field mapping to provide interpretation of the subsurface structural setting for use in the subsequent engineering analyses. The field studies, measurements, and recordings will be consistent with guidelines provided by the California Division of Mines and Geology (CDMG) Note 44.

B. Subsurface Exploration

The project area will be further explored by exploratory trenching and borings for stability assessment and material evaluation. Trenches are likely to be excavated using a track-mounted backhoe. The drilling program will consist of several geotechnical borings. The trenches and borings will be utilized for recovery of samples and measurement of subsurface structural information of weak planes or bedding. The Team will provide the surveying services necessary to obtain the data required for locations of the borings and trenches. These surveys will use the current coordinate system existing for the landfill site.

C. Geotechnical Laboratory Testing

1. Geotechnical laboratory testing of representative undisturbed and bulk samples will be performed to:
 - i. Obtain engineering properties (unit weight and shear strength) of bedrock and slide/bedding planes required for the design of cut and fill slopes
 - ii. Identify and classify the material types that will be excavated, so that their suitability

as clay liner, daily cover and final cover may be evaluated

- iii. Obtain other engineering properties, such as compressibility, expansion potential, and specific gravity
 - iv. Supplement the existing database on material properties
2. The results of the field exploration and laboratory testing will be presented to OCWR in the Basis of Design and Design Reports, as discussed in Task II-D (Slope Stability Analysis).

D. Slope Stability Analysis

1. Any areas of potential geologic instability will be evaluated in this task. Stability evaluations will be performed in accordance with the requirements of county, state, and federal agencies and landfill guidance documents. The results of these evaluations will provide input to development of the project design plan. The site topography and geological, geotechnical, and hydrogeological characterization data will be used to develop representative cross-sections for stability analyses.
2. Geologic cross sections and material property data will be inputted to a computerized slope stability program along with the external loading parameters to obtain factors of safety for the slopes. Potential sliding surfaces, both block and circular, will be evaluated. Where the slope geometry and bedding attitudes warrant, three-dimensional stability analyses are to be performed to optimize the design of stable slopes.
3. Based on the results of these analyses, areas where the factor of safety may be inadequate will be identified and potential stabilization measures will be considered. In conjunction with development of the final grading plan, critical cross-sections will be analyzed for slope stability under static loading conditions for short-term slopes and for both static and dynamic loading conditions for long-term slopes. The potential for development of unstable slope areas during grading will also be evaluated.
4. The design earthquake criteria specified in Federal Regulations (Subtitle D) and State Regulations (CCR Title 27) may make seismic loading the governing criterion for excavated slopes. Seismic analysis of slope may require computation of deformations to assess its seismic stability. The design criteria for slope stability evaluations will be summarized in the Technical Design Criteria Memorandum.
5. The results of the slope stability analyses including stability cross-sections and stability output results will be presented in a geotechnical design report to be included in the Basis of Design Report (discussed below).

III. HYDROLOGY AND DRAINAGE DESIGN

- A. Surface-water drainage controls will be analyzed and designed using the Rational Method in accordance with the Orange County Hydrology Manual. Modeling for complex hydraulic structures will be performed using HEC-HMS for the determination of peak flow rates and HEC-RAS for the determination of transitional flow depths, needed to size drainage devices. The surface-water drainage control may include swales, ditches, and down-chutes both within the back-cut and stockpile areas. Standard details developed by the County will be used where applicable. This project may include the following drainage designs:
1. Bench drains
 2. Down-drains with a concrete lining
 3. Earthen channel lining with an impermeable lining may be considered or other appropriate channel lining materials
 4. Desilting capacity must be employed where possible, but limited to areas where infiltration is not expected to affect stability of the landslide

IV. GRADING AND IMPROVEMENT PLANS

- A. The A-E will prepare the 30, 60, 90, and 100 percent design submittals. Included in the submittals will be drawings illustrating the layout and details of the work.
- B. AutoCAD and associated engineering software will be used to develop the final grading plans and estimates of the volumes of excavation and stockpile fill required. The grading plan will be developed based on the preliminary grading plan and the results of the geotechnical investigation, slope stability analyses and slope stabilization design. Drainage structures will be developed and designed based on the hydrology and hydraulic calculations discussed under Task III (Hydrology and Drainage Design). Grading details, such as benches and sub-drains, will be developed. The grading plans will include survey control, fill/cut boundaries, location of sub-drains, and delineation of grading areas and slope stabilization areas. Details and construction sequencing for slope stabilization measures will also be developed. Should it become feasible to construct a lined cell, then the work will also include design of liner subgrade and liner system, erosion control measures, stockpile grading plans and fill sequencing plans,
- C. Issues relating to the construction phasing, including storm water control and stockpile phasing, will be considered in development of the grading plan. Environmental impacts due to grading, including dust, noise, and vehicular traffic to and from the site, will also be evaluated. The results and recommendation along with all design criteria will be presented in a Technical Design Memorandum.

- D. Development of the grading plan will also consider current topography, the overall soils handling plan, soil stockpile configurations, grading, and operational concerns for slope and drainage maintenance.
- E. The design drawing should also address final CEQA mitigation measures or other necessary resource agencies' permit conditions.
- F. Electronic drawing files shall be provided.

V. PREPARE BASIS OF DESIGN AND DESIGN REPORTS

To accompany the 30, 60, 90, and 100 percent submittals, the Team will prepare design reports documenting the results of analyses performed during design.

A. Preliminary Technical Design Memorandum

- 1. The preliminary grading plan (30 percent) submittal will be accompanied with the Technical Design Memorandum. This document will include:
 - i. preliminary design criteria
 - ii. geotechnical investigation results
 - iii. quantity estimate

B. 60 Percent Basis of Design Report

- 1. The 60 percent submittal will accompany the Basis for Design Report. This document will include:
 - i. design criteria
 - ii. geotechnical investigation results
 - iii. an outline of technical specifications
 - iv. quantity estimate
 - v. preliminary cost estimate
 - vi. schedule
- 2. The A-E will develop an Engineer's cost estimate. The Engineer's estimate will be based on material quantities calculated from the construction drawings and unit prices obtained from industry sources, recent bid awards at the landfill, and the A-E's experience. The Engineer's estimate will also include the cost of CM and QA/QC services, to be procured separately.

C. 90 Percent Design Report

1. The 90 Percent Design Report will include results of the field exploration and laboratory testing work, slope stability analyses for the back-cut slopes, and design calculations for the slope stabilization measures and surface-water drainage controls and hydrology. Design computations will be included in appendices to each design report. This document will include:
 - i. design criteria
 - ii. geotechnical investigation results
 - iii. engineering calculations
 - iv. proposal, supplementary conditions and special provisions
 - v. technical specifications
 - vi. quantity estimate
 - vii. cost estimate
 - viii. schedule
2. The 90 percent submittal Design Reports will include bid document and technical specifications. The submittals will represent a complete package of the contract documents suitable for grading of the landslide back-cut and construction of the miscellaneous civil improvements, including the liner system if a lined cell is to be constructed. These documents will include general requirements, general conditions, supplementary conditions, special provisions, a QA/QC Plan, and construction drawings. Technical specifications will be prepared for grading, demolition, clearing and grubbing, potential landslide excavation, installation of the liner system, stockpile and engineered fill placement and compaction, quality control, sub-drain construction, slope stabilization, erosion control, and biological habitat restoration.

D. Final (100 Percent) Design Report

The final bid document submittal will be provided for final review and approval. It will be submitted in electronic and as reproducible formats.

VI. BIOLOGICAL MITIGATION AND PERMITTING

- A. The plans and specifications developed for this project will include mitigation features if required by the CEQA process. At this time, biological mitigation is expected to be limited to hydro-seeding. Extensive ecological restoration elsewhere onsite or offsite, such as requiring preparation of planting and irrigation plans, is not expected. The project may require:

IV. CULTURAL/SCIENTIFIC RESOURCES

- A.** The County may employ the services of a paleontological/archaeological firm to monitor the excavation at the project site. The A-E shall cooperate with the personnel of the firm. In the event the paleontologist or archaeologist asks the A-E to stop work in a particular section of the excavation, the A-E shall abide by the request immediately.
- B.** If the A-E's operations uncover, or A-E's employees find any burial grounds or remains,

If the A-E elects to dispose of Class III refuse in any OC Waste & Recycling operated landfill, the A-E shall be responsible for processing refuse through the scales and shall pay the current gate fees, unless it is specified otherwise in the Task Order.

Solid waste resulting from maintenance and service may be disposed of within the active landfill at no charge if acceptable within the guidelines of a Class III landfill and approved in writing by the County. The A-E shall contact the PM prior to disposal of solid waste resulting from maintenance and service. Furthermore, the A-E shall not dispose of such waste prior to receipt of a written approval from the PM, which identifies a designated disposal area.

Any other solid waste or liquid waste resulting from service and maintenance that is unacceptable for disposal in a Class III landfill (including tires) shall be the sole responsibility of the A-E and the cost of disposal shall be included as part of the Task Order. The A-E shall arrange for a State approved waste-handling firm to dispose of any material classified as hazardous or unacceptable waste. This firm shall be bonded and found acceptable to County of Orange CEO/Risk Management. The A-E shall submit proof of this firm being retained by the A-E within ten (10) calendar days of the effective date of this Agreement. - B. As part of its storm protection, the A-E shall provide a storm water management plan

(erosion control plan), to be reviewed and approved by the County. (The County is not responsible for damage if the Storm Water Management Plan is deficient or inadequate for managing storm water flows.)

VIII. NPDES STORM WATER DISCHARGES

Work under this Agreement shall be subject to the requirements of the NPDES storm water regulations.

The A-E shall comply with the NPDES Regulations and the Storm Water Pollution Protection Plan for the landfill at which the work is to be conducted. Construction-related activities, including but not limited to the elements of the SWPPP, shall be performed to eliminate non-storm discharges to the storm water control system, by the A-E and subcontractor(s). The A-E shall submit a Storm Water Management Plan in compliance with NPDES Regulations and Site specific SWPPP. OC Waste & Recycling will notify the A-E of any non-compliance with the foregoing stipulations, and appropriate actions shall be taken promptly. The A-E shall also notify OC Waste & Recycling of any condition that could lead to noncompliance with the permit requirements. The A-E shall be responsible for storm water monitoring at the landfill to comply with his proposed storm water plan, if necessary.

- (2) Subsurface or latent physical conditions at the site differing from those indicated; and
- (3) Unknown physical conditions at the site of any unusual nature, different materially from those ordinarily encountered and generally recognized as inherent in the work provided for in the Contract.

B. The County shall promptly investigate the conditions, and if it finds that the conditions do materially so differ, or do involve a hazardous waste, and cause a decrease or increase in the A-E's cost of, or the time required for, performance of any part of the work, the County shall issue a Change Order under the procedures described in the Contract. If hazardous waste is

found, the County will contact its key waste A-E to properly remove and dispose of the waste. The A-E shall not disturb the waste. The A-E shall immediately notify the County if the waste is found leaking, not containerized, or vapors or odors are detected.

- C. In the event that a dispute arises between the County and the A-E where the conditions materially differ, or involve hazardous waste, or a decrease or increase in the A-E's cost of, or the time required for performance of any part of the work, the A-E shall not be excused any scheduled completion date provided for by the Contract, but shall proceed with all work to be performed under the Contract. The A-E retains any and all rights provided either by the Contract or by law pertaining to the resolution of disputes and protests between the contracting parties.

X. A-E GENERATED HAZARDOUS WASTE

The A-E is responsible for the proper handling, storage, transportation (per all Federal, State and Local Regulations), and disposal of any hazardous wastes, liquid wastes or nuisance wastes (i.e. finely divided, powdery/dusty materials, strong odor, etc.) it generates on County property or elsewhere when performing work on the County's behalf.

The A-E must have an OC Waste & Recycling Safety Officer reviewed and County approved Emergency/ Contingency Plan for handling spills of hazardous, liquid or nuisance materials it is using while working on County property or elsewhere when performing work on the County's behalf. This shall include proper handling, removal and disposal of these materials per all applicable Federal and State requirements. The Plan shall also include emergency notification to County staff and emergency personnel.

The spill-damaged area(s) must be restored/repared to its original condition by the A-E in a correct and timely manner and to the satisfaction of the County.

The A-E shall provide copies of all manifests, bills of lading, etc. to the County upon request to verify proper disposal to a licensed, permitted facility has occurred.

The County has the authority to perform inspections of the A-E's work area at any time to insure all applicable regulations are being adhered to.

The A-E is responsible for training their employees, as required by OSHA CCR Title 8, in the proper handling, storage, transportation and disposal of hazardous materials. These employees must also be trained in the Emergency/Contingency Plan and know immediate response procedures should a release occur.

The A-E shall keep emergency response equipment and materials available in the working area, should a release occur.

XI. FUGITIVE DUST EMISSION CONTROL

The A-E shall comply with the requirements of the OC Waste & Recycling Fugitive Dust Emission Control Plan in conformance with the SCAQMD Rule 403. The A-E shall also notify OC Waste & Recycling any condition that could lead to noncompliance with the permit requirements.

The A-E shall submit a Dust Control Plan to be received and approved by the County.

If the A-E fails or refuses to correct the noncompliance immediately, OC Waste & Recycling may terminate the A-E's right to proceed with the work, by written notice to the A-E. In such event, OC Waste & Recycling may take over the work and prosecute the same to completion, by contract or otherwise at the A-E's expense, and may take possession of and utilize in completing the work such materials, appliances, and plants as may be on the site of the work and necessary therefore. Whether or not the A-E's right to proceed with the work is terminated, the A-E and the A-E's Sureties shall be liable for any damage to the County resulting from the A-E's refusal or failure to complete the work within the specified time. The A-E shall not be entitled to any time extensions or compensation for any cost due to any such action as a result of the A-E's failure to comply with those provisions of the OC Waste & Recycling Fugitive Dust Emission Control Plan within the A-E's control. The A-E shall be responsible for ensuring that all sub A-E(s) comply with the provisions of this section. The A-E shall be liable for any action or fine imposed by the SCAQMD on those incidents of noncompliance that are within the A-E's area of responsibility.

OC Waste & Recycling's Fugitive Dust Emission Control Plan (SCAQMD Rule 403-Fugitive Dust-April 1993) is available for review by the A-E in the offices of the OC Waste & Recycling Project Manager.

XII. BIOLOGICAL AND HABITAT PROTECTION

OC Waste & Recycling will inform the A-E of any biological resources that would or could be impacted by the project, and specify any required mitigation measures or procedures to protect those resources during construction. The A-E shall be responsible for complying with these protection measures, and for ensuring that all sub A-Es also comply. The County has the authority to perform inspections of the A-E's work area at any time to ensure that these measures or procedures are being followed.

XIII. MAINTENANCE FACILITY AND WORK AREA

Maintenance facility areas have been designated at the Landfill for the purpose of maintaining County equipment. This area is intended to be available for use by the County's Equipment Maintenance A-E and for other contractors and haulers only upon permission and at the convenience of OC Waste & Recycling. Any contractor permitted to utilize this area shall inspect the area and comply with any and all provisions of these Regulatory Compliance Section Articles. All contractors shall keep the facility clean. If this facility becomes unavailable to the County's Equipment Maintenance A-E for any reason, the County's Equipment Maintenance Contractor shall be provided an alternate location acceptable to the OC Waste & Recycling Regional Project Manager or designee. No such guarantee of an alternate location is made to any other contractor or hauler by the County. All costs related to relocating the facility is the sole responsibility of the County's Equipment Maintenance Contractor and shall be included as part of the fixed rate price agreement.

Any damage or repairs caused by the A-E or his vendors/suppliers to the designated maintenance area or other landfill facilities/projects shall be paid for or repaired by the A-E to the satisfaction of OC Waste & Recycling. All construction and/or replacement shall be done with materials and equipment of the same kind constructed or product installed. If the A-E does not repair the damaged facility/area within thirty (30) calendar days, the A-E shall pay for all construction/installation and related costs performed by the County by direct deduction plus a five percent (5%) administration fee from the monthly invoice or by invoiced separate payment. Any facility considered crucial to the operation of the landfill must be repaired immediately and

costs shall be paid by direct deduction plus a five percent (5%) administrative fee as above indicated in the same manner.

The A-E shall be responsible for maintaining clean equipment and a clean working area. Removal of contaminated soil as a result of maintenance activities shall be the sole responsibility of the A-E and shall be mitigated to OC Landfill's satisfaction immediately following written notice from the OC Waste & Recycling Project Manager. The area of contamination may be tested and certified by a third independent party qualified to conduct the evaluation. The proposed certifying firm shall submit qualifications to the OC Waste & Recycling Project Manager for acceptance and approval. All costs associated with contaminated soil removal, disposal and certification, if necessary, shall be the sole responsibility of the A-E. Prior to removal, the A-E must provide a manifest of transport showing legal disposal of contaminated material. A copy of the manifest, certified and approved by the disposal location, shall be provided to OC Waste & Recycling prior to shipment. If the manifest is not submitted,

OC Waste & Recycling will withhold or deduct directly the estimated cost of removal and disposal from monthly invoice, plus five percent (5%) administration fee until the manifest or appropriate documentation is submitted by the A-E.

Upon written notice from the OC Waste & Recycling Project Manager, if the A-E does not comply with the removal of the contaminated soil immediately, OC Waste & Recycling will remove, process, transport, and certify the material as stated above and all costs incurred by OC Waste & Recycling for removal and disposal, plus a five percent (5%) administrative fee will be deducted directly from the A-E's monthly invoice or through supplemental payment as approved by the OC Waste & Recycling Project Manager or designee.
