**DEFINITIONS**

DPA shall mean the Deputy Purchasing Agent assigned to this Contract.

ARTICLESGeneral Terms and Conditions:

- A. **Governing Law and Venue:** This Contract has been negotiated and executed in the state of California and shall be governed by and construed under the laws of the state of California. In the event of any legal action to enforce or interpret this Contract, the sole and exclusive venue shall be a court of competent jurisdiction located in Orange County, California, and the parties hereto agree to and do hereby submit to the jurisdiction of such court, notwithstanding Code of Civil Procedure Section 394. Furthermore, the parties specifically agree to waive any and all rights to request that an action be transferred for adjudication to another county.
- B. **Entire Contract:** This Contract contains the entire Contract between the parties with respect to the matters herein, and there are no restrictions, promises, warranties or undertakings other than those set forth herein or referred to herein. No exceptions, alternatives, substitutes or revisions are valid or binding on County unless authorized by County in writing. Electronic acceptance of any additional terms, conditions or supplemental Contracts by any County employee or agent, including but not limited to installers of software, shall not be valid or binding on County unless accepted in writing by County's Procurement Officer or designee.
- C. **Amendments:** No alteration or variation of the terms of this Contract shall be valid unless made in writing and signed by the parties; no oral understanding or agreement not incorporated herein shall be binding on either of the parties; and no exceptions, alternatives, substitutes or revisions are valid or binding on County unless authorized by County in writing.
- D. **Taxes:** Unless otherwise provided herein or by law, price quoted does not include California state sales or use tax. Out-of-state Contractors shall indicate California Board of Equalization permit number and sales permit number on invoices, if California sales tax is added and collectable. If no permit numbers are shown, sales tax will be deducted from payment. The Auditor-Controller will then pay use tax directly to the State of California in lieu of payment of sales tax to the Contractor.
- E. **Delivery:** Time of delivery of goods or services is of the essence in this Contract. County reserves the right to refuse any goods or services and to cancel all or any part of the goods not conforming to applicable specifications, drawings, samples or descriptions or services that do not conform to the prescribed statement of work. Acceptance of any part of the order for goods shall not bind County to accept future shipments nor deprive it of the right to return goods already accepted at Contractor's expense. Over shipments and under shipments of goods shall be only as agreed to in writing by County. Delivery shall not be deemed to be complete until all goods or services have actually been received and accepted in writing by County.
- F. **Acceptance Payment:** Unless otherwise agreed to in writing by County; 1) acceptance shall not be deemed complete unless in writing and until all the goods/services have actually been received, inspected, and tested to the satisfaction of County, and 2) payment shall be made in arrears after satisfactory acceptance.
- G. **Warranty:** Contractor expressly warrants that the goods covered by this Contract are 1) free of liens or encumbrances, 2) merchantable and good for the ordinary purposes for which they are used, and 3) fit for the particular purpose for which they are intended. Acceptance of this order shall constitute an agreement upon Contractor's part to indemnify, defend and hold County and its indemnities as identified in **article "Z"** below, and as more fully described in **article "Z,"** harmless from liability, loss, damage and expense, including reasonable counsel fees, incurred or

sustained by County by reason of the failure of the goods/services to conform to such warranties, faulty work performance, negligent or unlawful acts, and non-compliance with any applicable state or federal codes, ordinances, orders, or statutes, including the Occupational Safety and Health Act (OSHA) and the California Industrial Safety Act. Such remedies shall be in addition to any other remedies provided by law.

- H. **Patent/Copyright Materials/Proprietary Infringement:** Unless otherwise expressly provided in this Contract, Contractor shall be solely responsible for clearing the right to use any patented or copyrighted materials in the performance of this Contract. Contractor warrants that any software as modified through services provided hereunder will not infringe upon or violate any patent, proprietary right, or trade secret right of any third party. Contractor agrees that, in accordance with the more specific requirement contained in **article “Z”** below, it shall indemnify, defend and hold County and County Indemnitees harmless from any and all such claims and be responsible for payment of all costs, damages, penalties and expenses related to or arising from such claim(s), including, costs and expenses but not including attorney’s fees.
  
  - I. **Assignment:** The terms, covenants, and conditions contained herein shall apply to and bind the heirs, successors, executors, administrators and assigns of the parties. Furthermore, neither the performance of this Contract nor any portion thereof may be assigned by Contractor without the express written consent of County. Any attempt by Contractor to assign the performance or any portion thereof of this Contract without the express written consent of County shall be invalid and shall constitute a breach of this Contract.
  
  - J. **Non-Discrimination:** In the performance of this Contract, Contractor agrees that it will comply with the requirements of Section 1735 of the California Labor Code and not engage nor permit any subcontractors to engage in discrimination in employment of persons because of the race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, marital status, or sex of such persons. Contractor acknowledges that a violation of this provision shall subject Contractor to penalties pursuant to Section 1741 of the California Labor Code.
  
  - K. **Termination:** In addition to any other remedies or rights it may have by law, County has the right to immediately terminate this Contract without penalty for cause or after 30 days’ written notice without cause, unless otherwise specified. Cause shall be defined as any material breach of contract, any misrepresentation or fraud on the part of the Contractor. Exercise by County of its right to terminate the Contract shall relieve County of all further obligation.
- In the event of change of control, to the extent necessary, Contractor shall provide reasonably requested assistance in the transferring of services.
- L. **Consent to Breach Not Waiver:** No term or provision of this Contract shall be deemed waived and no breach excused, unless such waiver or consent shall be in writing and signed by the party claimed to have waived or consented. Any consent by any party to, or waiver of, a breach by the other, whether express or implied, shall not constitute consent to, waiver of, or excuse for any other different or subsequent breach.
  
  - M. **Independent Contractor:** Contractor shall be considered an independent contractor and neither Contractor, its employees, nor anyone working under Contractor shall be considered an agent or an employee of County. Neither Contractor, its employees nor anyone working under Contractor shall qualify for workers’ compensation or other fringe benefits of any kind through County.

- N. **Performance Warranty:** Contractor shall warrant all work under this Contract, taking necessary steps and precautions to perform the work to County's satisfaction. Contractor shall be responsible for the professional quality, technical assurance, timely completion and coordination of all documentation and other goods/services furnished by the Contractor under this Contract. Contractor shall perform all work diligently, carefully, and in a good and workmanlike manner; shall furnish all necessary labor, supervision, machinery, equipment, materials, and supplies, shall at its sole expense obtain and maintain all permits and licenses required by public authorities, including those of County required in its governmental capacity, in connection with performance of the work. If permitted to subcontract, Contractor shall be fully responsible for all work performed by subcontractors.
  
- O. **Insurance Requirements:** Prior to the provision of services under this Contract, the Contractor agrees to purchase all required insurance at Contractor's expense, including all endorsements required herein, necessary to satisfy the County that the insurance provisions of this Contract have been complied with. Contractor agrees to keep such insurance coverage, Certificates of Insurance, and endorsements on deposit with the County during the entire term of this Contract. In addition, all subcontractors performing work on behalf of Contractor pursuant to this Contract shall obtain insurance subject to the same terms and conditions as set forth herein for Contractor.

Contractor shall ensure that all subcontractors performing work on behalf of Contractor pursuant to this Contract shall be covered under Contractor's insurance as an Additional Insured or maintain insurance subject to the same terms and conditions as set forth herein for Contractor. Contractor shall not allow subcontractors to work if subcontractors have less than the level of coverage required by County from Contractor under this Contract. It is the obligation of Contractor to provide notice of the insurance requirements to every subcontractor and to receive proof of insurance prior to allowing any subcontractor to begin work. Such proof of insurance must be maintained by Contractor through the entirety of this Contract for inspection by County representative(s) at any reasonable time.

All self-insured retentions (SIRs) shall be clearly stated on the Certificate of Insurance. Any self-insured retention (SIR) in an amount in excess of Fifty Thousand Dollars (\$50,000) shall specifically be approved by the County's Risk Manager, or designee, upon review of Contractor's current audited financial report. If Contractor's SIR is approved, Contractor, in addition to, and without limitation of, any other indemnity provision(s) in this Contract, agrees to all of the following:

- 1. In addition to the duty to indemnify and hold the County harmless against any and all liability, claim, demand or suit resulting from Contractor's, its agents, employee's or subcontractor's performance of this Contract, Contractor shall defend the County at its sole cost and expense with counsel approved by Board of Supervisors against same; and
- 2. Contractor's duty to defend, as stated above, shall be absolute and irrespective of any duty to indemnify or hold harmless; and
- 3. The provisions of California Civil Code Section 2860 shall apply to any and all actions to which the duty to defend stated above applies, and the Contractor's SIR provision shall be interpreted as though the Contractor was an insurer and the County was the insured.

If the Contractor fails to maintain insurance acceptable to the County for the full term of this Contract, the County may terminate this Contract.

**Qualified Insurer**

The policy or policies of insurance must be issued by an insurer with a minimum rating of A- (Secure A.M. Best's Rating) and VIII (Financial Size Category as determined by the most current edition of the **Best's Key Rating Guide/Property-Casualty/United States or ambest.com**). It is preferred, but not mandatory, that the insurer be licensed to do business in the state of California (California Admitted Carrier).

If the insurance carrier does not have an A.M. Best Rating of A-/VIII, the CEO/Office of Risk Management retains the right to approve or reject a carrier after a review of the company's performance and financial ratings.

County shall notify Contractor in writing of changes in the insurance requirements. If Contractor does not deposit copies of acceptable Certificates of Insurance and endorsements with County incorporating such changes within thirty (30) days of receipt of such notice, this Contract may be in breach without further notice to Contractor, and County shall be entitled to all legal remedies.

The procuring of such required policy or policies of insurance shall not be construed to limit Contractor's liability hereunder nor to fulfill the indemnification provisions and requirements of this Contract, nor act in any way to reduce the policy coverage and limits available from the insurer.

P. **Changes:** Contractor shall make no changes in the work or perform any additional work without the County's specific written approval.

Q. **Change of Ownership/Name, Litigation Status, Conflicts with County Interests:**

Contractor agrees that if there is a change or transfer in ownership of Contractor's business prior to completion of this Contract, and the County agrees to an assignment of the Contract, the new owners shall be required under the terms of sale or other instruments of transfer to assume Contractor's duties and obligations contained in this Contract, and complete them to the satisfaction of the County.

County reserves the right to immediately terminate the Contract in the event the County determines that the assignee is not qualified or is otherwise unacceptable to the County for the provision of services under the Contract.

In addition, Contractor has the duty to notify the County in writing of any change in the Contractor's status with respect to name changes that do not require an assignment of the Contract. The Contractor is also obligated to notify the County in writing if the Contractor becomes a party to any litigation against the County, or a party to litigation that may reasonably affect the Contractor's performance under the Contract, as well as any potential conflicts of interest between Contractor and County that may arise prior to or during the period of Contract performance. Each party further acknowledges that they have not been influenced to any extent whatsoever in executing this Contract by any other party hereto or by any person representing them, or both. Accordingly, any rule or law (including California Civil Code Section 1654) or legal decision that would require interpretation of any ambiguities in this Contract against the party that has drafted it is not applicable and is waived. The provisions of this Contract shall be interpreted in a reasonable manner to effect the purpose of the parties and this Contract.

The Contractor's written demand shall be fully supported by factual information, and, if such demand involves a cost adjustment to the Contract, the Contractor shall include with the demand a written statement signed by a senior official indicating that the demand is made in good faith, that the supporting data are accurate and complete, and that the amount requested accurately reflects the Contract adjustment for which the Contractor believes the County is liable.

Pending the final resolution of any dispute arising under, related to, or involving this Contract, the Contractor agrees to diligently proceed with the performance of this Contract, including the

delivery of goods and/or provision of services. The Contractor's failure to diligently proceed shall be considered a material breach of this Contract.

Any final decision of the County shall be expressly identified as such, shall be in writing, and shall be signed by the County DPA or his designee. If the County fails to render a decision within 90 days after receipt of the Contractor's demand, it shall be deemed a final decision adverse to the Contractor's contentions. If the County discovers any errors or omissions prior to approving Contractor’s reports, files and other written documents, the reports, files or documents will be returned to Contractor for correction. Should the County or others discover errors or omissions in the reports, files or other written documents submitted by the Contractor after County approval thereof, County approval of Contractor’s reports, files or documents shall not be used as a defense by Contractor in any action between the County and Contractor, and the reports, files or documents will be returned to Contractor for correction.

This includes compliance with current local, County, State or other legal intents and terms of the applicable Occupational Safety and Health Administration (OSHA) and CAL/OSHA Safety orders at all times so as to protect all persons, including Contractor's employees and agents, against injury or damage to property.
- M. Best Management Practices:
1. Contractor shall conduct operations under this Contract so as to assure that pollutants do not enter municipal storm drain systems which systems are comprised of, but are not limited to curbs and gutters that are part of the street systems ("Stormwater Drainage System"), and to ensure that pollutants do not directly impact "Receiving Waters" (as used herein, Receiving Waters include, but are not limited to, rivers, creeks, streams, estuaries, lakes, harbors, bays and oceans).
  2. The Santa Ana and San Diego Regional Water Quality Control Boards have issued National Pollutant Discharge Elimination System (NPDES) permits ("Stormwater Permits") to the County of Orange, and to the Orange County Flood Control District (District) and cities within Orange County, as co-permittees (hereinafter collectively referred to as "County Parties") which regulate the discharge of urban runoff from areas within the County of Orange, including the Premises under this Contract. The County Parties have enacted water quality ordinances that prohibit conditions and activities that may result in polluted runoff being discharged into the Stormwater Drainage System.
  3. To assure compliance with the Stormwater Permits and water quality ordinances, the

County Parties have developed a Drainage Area Management Plan (DAMP) which includes a Local Implementation Plan (LIP) for each jurisdiction that contains Best Management Practices (BMPs) that parties using properties within Orange County must adhere to. As used herein, a BMP is defined as a technique, measure, or structural control that is used for a given set of conditions to manage the quantity and improve the quality of stormwater runoff in a cost-effective manner. These BMPs are found within the County's LIP in the form of Model Maintenance Procedures and BMP Fact Sheets (the Model Maintenance Procedures and BMP Fact Sheets contained in the DAMP/LIP shall be referred to hereinafter collectively as "BMP Fact Sheets") and contain pollution prevention and source control techniques to eliminate non-stormwater discharges and minimize the impact of pollutants on stormwater runoff.

4. BMP Fact Sheets shall include but not be limited to the following which may be viewed and downloaded at:  
<http://ocwatersheds.com/documents/bmp/industrialcommercialbusinessesactivities>
    - a) IC17
    - b) IC21
    - c) IC24
  5. These BMP Fact Sheets may be modified during the term of the Contract; and County's Project Manager shall provide Contractor with any such modified BMP Fact Sheets.
  6. Contractor shall, throughout the term of this Contract, comply with the BMP Fact Sheets as they exist now or are modified, and shall comply with all other requirements of the Stormwater Permits, as they exist at the time this Contract commences or as the Stormwater Permits may be modified. Contractor agrees to maintain current copies of the BMP Fact Sheets on the job sites throughout the term of this Contract. The BMPs applicable to uses authorized under this Contract must be performed as described within all applicable BMP Fact Sheets.
  7. Contractor may propose alternative BMPs that meet or exceed the pollution prevention performance of the BMP Fact Sheets. Any such alternative BMPs shall be submitted to the County's Project Manager for review and approval prior to implementation.
    - a) County's Project Manager may visit the job sites and/or review Contractor's records at any time to assure that activities conducted on the job sites comply with the requirements of this section. Contractor may be required to implement a self-evaluation program to demonstrate compliance with the requirements of this section.
- N. Identification and Scheduling of Work: County conducts recurring inspections of all County maintained roads, flood control channels, and County facilities and investigates citizen complaints. County staff documents the work with Digital photos, a short summary of the problem and required repair using a Maintenance Inspection Report (MIR) form. This report includes the specific location and Thomas Guide reference. County staff reviews, prioritizes and "packages" these reports to include several locations in the same general geographic area. Work packages, including photos, will be prepared for Contractor biweekly. Biweekly work package may include any of the work items in the Contract. Contractor will furnish a work plan indicating the day/date for work on each location in the biweekly work package. County reserves the right to insert up to five (5) additional locations into a biweekly work package at any time. When this occurs, Contractor may request County to delete one or more other work locations from that biweekly work package if the total work package, including additional work, cannot be completed during designated completion period. County will respond to Contractor requests for deletion of work by close of business the next workday.
- O. Work Completion Schedule: County will complete preparation of the biweekly work package by close of business Tuesday for the two-week period beginning the following Monday. All work in the work package is to be completed by close of business the second

Friday following the beginning of the work period. All work in each biweekly work package is to be completed within the two-week period designated for that work package. Contractor is responsible for notifying County if weather or other conditions preclude working on some or the entire work package. Such notification shall be made within four hours of the event/occurrence.

County and Contractor are required to discuss the impact of weather or other agreed to delays in an attempt to identify these locations in the biweekly work package that cannot be completed on schedule. County will normally include deleted items in the next biweekly work package.

- P. Equipment and Tools: All equipment and tools utilized for tree pruning shall be designed for tree and shrub trimming and properly sharpened to adequately sever limb in a clean manner. **USE OF CLIMBING SPURS AND/OR SPIKED SHOES IS PROHIBITED.**
- Q. Access Gates: Contractor shall be provided with keys to the access gates upon request. Contractor will return all keys upon completion of work and prior to request for payment. For each key not returned, the sum of One Hundred Dollars (\$100.00) will be deducted and forfeited from any payment due to Contractor.
- Contractor shall keep all access gates closed except when entering and leaving the worksite. Contractor shall close and lock all access gates at the end of each working day. In the event that County is called out to lock a gate left open by Contractor, the sum of Two Hundred and Fifty Dollars (\$250.00) based on minimum call back payments, will be deducted and forfeited from any payment due to Contractor.
- R. Tree Inventory Program: All GIS/GPS and Tree Inventory work shall be performed by “in-house” Contractor. All GIS and inventory records created by the Contractor are property of the County of Orange. Contractor shall create and maintain County tree inventory (including species) in geodatabase format and shall be fully compatible with ESRI ArcGIS newest version. GPS work shall be performed using Trimble GeoXH 6000 or better. Contractor shall follow County workflow and schedule for import and export of tree inventory updates to/from Contractor's inventory system and County GIS. Contractor shall update and modify geodatabase themes as required by the County.
1. Tree Inventory Updates and additions: Contractor shall provide updates of the County GIS tree inventory at no additional cost to the County. Contractor shall update inventory, including metadata, and add new entries at no additional charge to the County for any tree that is the subject of any maintenance, inspection, or evaluation action.
- S. Pesticide Usage and Reporting: Contractor shall submit Pesticide Usage Report(s) to County Project Coordinator at the end of each month summarizing the facilities treated, pests treated, pesticides used, pesticide application rates, man hours and equipment.
- T. Pests and Diseases: All trees known or suspected to be diseased/infested, Contractor shall disinfect all tools and cut surfaces after each cut and between trees. All trees with known or suspected PHSB, Fusarium, Gold Spotted Oak Borer or other high priority pests/pathogens as determined by the County. Contractor shall handle all debris in a manner consistent with newest version of all appropriate Best Management Practices (BMP), which minimizes the chance of spreading infection or infestation. No additional charges for disinfection or special handling shall be allowed.
- U. PSHB/FD or other high priority pests/pathogens surveys and visual monitoring: Contractor shall perform visual surveys of OC Public Works trees from February through October, when beetle activity is easier to detect, for the presence of PSHB/FD or other high priority pests/pathogens and map its distribution. Trees that exhibit symptoms of PSHB/FD or other

high priority pests/pathogens will be identified and the level of infestation will be assessed. Symptomatic trees that are located in PSHB-areas or that are non-reproductive hosts will be sampled for DNA analysis to confirm the presence of PSHB/FD or other high priority pests/pathogens. Coordinates will be recorded through either the ArcGIS Collector App for immediate updates to the County Tree Inventory. Mapping and monitoring the distribution of PSHB or other high priority pests/pathogens within the County will allow us to study the spread of the pests, progression of symptoms, and to better implement control procedures.

**V. Tree Planting**

1. Tree species, size, and planting shall be approved by County project manager.
2. Tree planting consists of the installation of nursery stock container or palm trees supplied by the Contractor.

## ATTACHMENT C

**UC AGRICULTURAL AND NATURAL RESOURCES AND COOPERATIVE  
EXTENSION REQUIREMENTS FOR INFESTED MATERIAL DISPOSAL**

**Infested Material Disposal**

Wood from ISHB-infested trunks and branches is still full of live beetles. If infested wood is not properly handled, beetles will emerge from the cut logs and attack new hosts. This two-step process will help prevent the beetles from spreading to other locations or re-infesting property. Details on each procedure can be found at <https://ucanr.edu/sites/pshb/management/#prevention>.

**Proper treatment and/or disposal of infested material**

## STEP 1

**Chip infested wood immediately after tree removal or pruning.** Running ISHB-infested material through a woodchipper is one of the most effective ways to kill the vast majority of beetles living in cut logs.

## A. Infested Tree Treatments at Removal Site:

1. Chip or grind the entire tree (trunk and all branches) to  $\leq 1$ -inch particle size. If the  $< 1$ -inch chips are to be moved offsite for utilization within a non-infested area, they will need to be solarized or composted to kill any ISHB that survived the chipping process.
2. Do not leave piles of untreated, infested wood uncovered - if wood cannot be chipped immediately, tightly wrap the cut logs in plastic tarp and ensure an air-tight seal around the wood to contain any emerging beetles. Follow directions for solarization or kiln-drying infested wood to kill the ISHB and render it safe for transport.
3. Avoid leaving firewood-size logs on site as an attractive nuisance which may be picked up and transported randomly by someone looking for free firewood.
4. Grind the stump and exposed large roots of removed trees to below ground level. If the stump is not accessible for a grinder, flush cut the stump as close to ground level as possible. Fill in exposed stump hole with topsoil or mulch. Ensure that all woodchips left over from the stump grinding are  $< 1$ " (LxWxH) or less in size; re-chip wood particles  $> 1$  inch in size. Solarization or composting of wood chips can further reduce the possibility of adult beetle dispersal which is critical if the wood chips are to be dispersed in un-infested areas.

## B. Infested Tree Treatments Off-site:

If it is necessary to treat infested material off-site from the tree removal location, take the following precautions:

When transporting infested untreated wood (logs, branches stumps or chips) for treatment or disposal to an approved facility, securely cover the load with a solid tarp to ensure beetles do not escape during transit.

- Approved facilities will be determined by the County Agricultural Commissioner (CAC) with the concurrence of a Cal Fire Pest Specialist.
- Approved facilities must follow protocols developed by the CAC in cooperation with the regulatory agencies involved in permitting the facility (County Local Enforcement Agency and/or others). The protocols should include steps to be taken to eliminate the risk of spread of ISHB from the site once delivered. These steps may include but are not limited to specifying how quickly the material must be treated and ensuring the hauler has thoroughly removed all infested material before leaving the site after delivery.

## STEP 2

After chipping infested wood, select one of the options below to ensure that beetles and fungi are destroyed. Some of these methods also work for logs that cannot be chipped.

Always cover the material in transit when transporting infested plant material to another site for treatment.

Acceptable Wood Management Practices for Treating Infested Materials:

1. Solarization – This method is suitable for handling both infested chips and logs. When done correctly, solar energy will heat plant material until both the beetle and fungi are killed. It is most effective during the peak of the summer, when temperatures are high, and days are long.
  - July - August: cover chips/logs with sturdy plastic sheeting (≥6ml and UV resistant) for at least 6 weeks
  - Temperatures during these months should be regularly above 95°F
  - September - June: cover chips/logs with sturdy plastic sheeting (≥6ml and UV resistant) for at least 6 months.
  - Fully contain chips and logs (and beetles) by wrapping plastic both underneath and over the material
  - Keep log/chip layers as thin as possible (2 logs deep maximum) to ensure even heating throughout the pile.

Other tips for proper solarization:

- Use a sturdy plastic sheet or tarp that can withstand rain and wind. Clear plastic is preferred since it lets more sunlight through and heats the content more efficiently.
- Fully contain chips, logs, and beetles by wrapping plastic both underneath and over the material.
- Keep log or chip layers as thin as possible, two logs deep maximum, to ensure even heating throughout the pile.

2. Composting - Proper composting can effectively control the plant pathogens that cause Fusarium Dieback. Composted, chipped plant material may then be re-purposed as mulch or added back into soil to improve texture and water retention.

- It is recommended that wood chips be composted at a professional composting facility that has earned the US Composting Council's Seal of Testing Assurance (STA), <https://www.compostingcouncil.org/page/participants>. Facilities in the STA program are tested for proper decomposition and pathogen control.

3. Kiln Drying

- Unchipped, ISHB-infested wood can be decontaminated by the heat used in kiln-drying. To destroy the fungi that cause Fusarium Dieback, it is necessary to heat the material for at least 60 minutes at 60°C. Wood that has been disinfected can then be re-purposed.

4. Biogenesis - Biogenesis facilities burn green waste and convert it into energy.

- When transporting infested wood (logs or chips), always securely cover with a solid tarp the material in transit if being transported off site and taken to an approved disposal facility.
- Routes should be the shortest route possible and completed in the shortest amount of time possible and with no long stops during route.

C. Sterilization of Equipment Guidelines when Removing Infested Material

1. Hand tools and power tools for cutting (e.g. loppers, chainsaws) - 70% ETOH or Lysol®. Chlorox® bleach diluted to 25% can be used as well.
2. Mechanized equipment (Includes vehicle tires, shovels, stump grinders, trenchers, chipper trucks, chippers, tractors, etc). make sure it's clean of organic debris and spray with Lysol®.
