## Attachment A

## Scope of Work

**I. Overview**

BMI Imaging Systems engaged in a pilot project in 2010-2011 for the Clerk-Recorder Department to convert microfilmed birth records to digital format. The Contractor had produced quality results and the Department decided to continue converting death, marriage and amended records in December 2011. Currently, the Department has 25 user licenses to access the images through the on-premise Digital Reel System. The County desires to purchase Software Maintenance to receive any upgrades to the system along with adding this one-time project to Truncate Social Security Numbers to Official Records for the years 1980 & 1981

**II. Scope of Work****A. Truncation of SSN's Official Records 1980 & 1981**

The County is required by statute to make a reasonable effort to redact the SSN's from the public facing Official Records from 1980 – to date. The County estimates this project involves 1,781,600 images for the years 1980 and 1981. The end result of this project will be two sets of data:

- Redacted Copy (public access): Image copies with the first 5 (five) characters of the SSN redacted.
- Non-Redacted Copy (admin access): Redacted documents will contain a see-through red box.

Utilizing specialized OCR technology, SSNs will be located and the first five characters will be redacted for the public, viewable to the staff. These automatic detections will be manually reviewed for accuracy. While the statute allows for less than 100 percent location and redaction of SSN's, the system will include manual redaction tools that will allow the County Staff to apply redactions to any SSN's brought to their attention following deployment to the public. The results of the OCR process are largely dependent upon the image quality of the documents and placement of the SSN's within. For these reasons, BMI does not guarantee the accuracy rate of the process.

The end result will be two sets of data as follows:

- Redacted Copy for public access: First 5 characters of the SSN redacted
- Non-Redacted Copy: Original image set for County staff access only

The following steps will be followed as part of the process:

1. Images are provided for redaction.
2. Rule writing process implemented.
  - a. Test and modify Orange County SSN Truncation ruleset as needed for historical project.
3. OCR process Official Records Images.
4. Apply Automated Redaction Rules Processing.
